

CHRP for non-Dutch speaking persons

CHRP certification in the Netherlands is executed by the certification body CRP www.cerp.nl.

The certification process is in Dutch. But CRP has certified persons who do not master the Dutch language. In practice this means:

- you can translate all CHRP documents by using google translate or another tool
- you can hand in documents in the English language
- you have to use a certified interpreter during the assessment

You can find all information on <https://www.cerp.nl/chrp>

We advise to start with reading [the CHRP assessment framework](#).

You can assess yourself by means of this framework to see if you comply with the CHRP standard.

If you think that you do comply you can start the certification procedure by signing the certification agreement with this [link](#).

If you need help with enhancing your competences we advise that you contact [NVP](#), the association for HR professionals in the Netherlands.

With kind regards,

Gert de Gruijter
Managing director
